'Anti-vax' labelling and the mainstream media...who is co-ordinating this?!?!

1 message

There must be an investigation into how international vaccination policy is being manipulated to develop massive vaccine markets, with a spotlight being thrown on conflicts of interest, and identifying who is behind the demonising and censoring of people who question vaccination policy.

The mainstream media has been shown to be unreliable, biased and often conflicted, and is failing to critically analyse and report on international vaccination policy for the global community.

Is the highly conflicted Bill and Melinda Gates Foundation shaping the media's reporting on vaccination issues? This article published in February 2013 provides some interesting background on the Gates' historical influence on the media: [Behind the scenes with the Gates Foundation's 'strategic media partners'](#).

In regards to biased media, see for example this recent article in *The Guardian* which includes reference to Robert F. Kennedy Jr. and Children's Health Defense, and Stop Mandatory Vaccination: [US anti-vaxxers aim to spread fear over future coronavirus vaccine](#) Note that *The Guardian* receives funding from the Bill and Melinda Gates Foundation, which is driving 'the race' for coronavirus vaccine products.

The Guardian article says "**Anti-vaxxers' influence and power could affect Americans' willingness to take a Covid-19 vaccine, experts warn**".

This is yet another propaganda article to try and discredit and marginalise people who are legitimately questioning international vaccination policy, and the burgeoning number of vaccine products and revaccinations being added to international vaccination schedules. People with valid concerns about vaccination are labelled 'anti-vaxxers' and described as an 'anti-vaxxer movement' in a way which seeks to marginalise them in broader society, to alienate them as 'untouchables'.

Who is co-ordinating this? It's been going on for years, with the demonising of Andrew Wakefield, (via the Murdoch *Sunday Times* newspaper and *The BMJ*), central to the narrative, and now widening to encompass others. For those who follow such things, **it's obvious this is being orchestrated, but by whom?** We know The Vaccine Confidence Project headed by Heidi Larson is central to monitoring global dissent on vaccination, and that this organisation has been funded by the Bill & Melinda Gates Foundation in the past. But there are others in the network of monitoring dissent, e.g. Julie Leask and Katie Attwell in Australia. The lobbying of coercive vaccination groups such as SAVN and Friends of Science in Medicine in Australia, and similar lobbying internationally, must be investigated to understand the big picture.

We've seen the deliberate hindrance of discussion on vaccination going on for years, but it's reaching a crescendo now, with censorship on social media interfering with citizens' rights to discuss vaccination. It remains to be seen what will be the outcome of Donald Trump's [Executive Order on Preventing Online Censorship](#).

We're seeing biased international media cranking up yet again, with the current coronavirus crisis being used to demonise people questioning vaccination, and information being twisted and ignored to suit the purposes of vested interests, see for example:

- [How coronavirus 'changes the game' for the anti-vaccination movement](#) (ABC, Australia)
- ['Act now': AMA urges health education to combat 'growing' anti-vaxxer movement](#) (*The Sydney Morning Herald*)
- [Australian anti-vaxxers label Covid-19 a 'scam' and break distancing rules at anti-5G protests](#) (*The Guardian*)
- [Coronavirus: Bill Gates 'microchip' conspiracy theory and other vaccine claims fact-checked](#) (BBC)
- [Coronavirus anti-vaxxers aren't a huge threat yet. How do we keep it that way?](#) (*The Conversation*, Australia)
- [The anti-vax movement is using growing hesitation around the coronavirus vaccine to attract more people](#) (*Business Insider*)

See also **Tracking the Anti-Vaccination Movement**, an article published by the National Press Foundation (US), which reports on **"a new digital tool called Project VCTR that can track anti-vax messengers and messages across Twitter, Facebook, popular websites and other platforms"**. And who is behind the official sounding 'National Press Foundation'? Have a look at the list of funders, which also includes vaccine manufacturer GSK, and a host of others who may have significant conflicts of interest: <https://nationalpress.org/about-npf/funders/>

Citizens questioning vaccination policy must demand to be heard, and governments, vaccine manufacturers and others such as Bill Gates and conflicted academics must be made accountable. The ante has been upped considerably with the arrival of 'COVID-19', and Bill Gates insistence that a coronavirus vaccine be made **"available to almost every person on the planet"**.

In the space of a few months we've seen another disease pop up as a global threat, i.e. 'COVID-19' as the result of SARS-CoV-2, a virus of still yet undetermined origin...

There are many unknowns about SARS-CoV-2/COVID-19, and yet it's reported over a hundred groups are involved in the 'race for the vaccine', with very questionable vaccine trials under way, and already calls for resulting vaccine products to be compulsory. It's shocking to see how this is being fast-tracked, without any real consideration of data from the current crisis - in this regard see Dr Malcolm Kendrick's blog post: **COVID deaths - how accurate are the statistics?**

The driver of the current race for coronavirus vaccine products is Bill Gates, who has been manipulating international vaccination policy for years, and his Foundation is now the top financial donor to the World Health Organisation, after the recent withdrawal by the US/Donald Trump.

Gates is an unelected individual who is wielding his enormous wealth and political influence to impose his will on the global community, see for example **Bill and Melinda Gates personal phone call with Boris Johnson**, and Gates' involvement re other vaccine lobbying i.e. **Bill Gates Seeks EU Help on Vaccine Aid, EU-led telethon raises 7.4 billion for vaccine financing - without US**, and **Australia pledges \$350 million to EU coronavirus vaccine research fund**.

James Corbett's recent series of documentaries on Gates provides valuable history and analysis, i.e. **Meet Bill Gates; Bill Gates' Plan to Vaccinate the World; How Bill Gates Monopolized Global Health** and **Bill Gates and the Population Control Grid**.

James Corbett's documentaries also include reference to Gates buying the media, for example providing funding to *The Guardian*, NPR and the BBC - in what other ways are Gates' interests trying to control the media and social media?

Again, there must be an investigation into how international vaccination policy is being manipulated to develop massive vaccine markets, with a spotlight being thrown on conflicts of interest, and who is behind the demonising and censoring of people who question vaccination policy. The mainstream media has been corrupted and is failing the global community, it's worse than useless. The mainstream media model is broken and redundant, time for a new way ahead.
